# COMFORT

## 2. HEALTHY AIR SYSTEM

**GREENERGY** combines fresh air ventilation, humidity control, and air filtration to reduce the proliferation of airborne viruses. We use a multi-pronged approach to effective virus protection.

**Dehumidification/Humidification** - unhealthy humidity can potentially cause many issues for your health and home. According to research, the recommended ideal humidity level for your home should be between 40%-60%.

The **BENEFITS** of having healthy humidity are as follows:

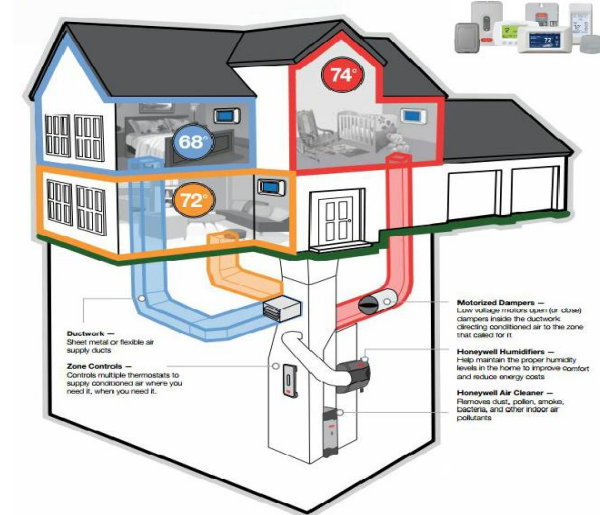

- Mold and Mildew
- Prevent Musty Odors
- Alleviate Allergies
- Minimize Condensation
- Reduce Pest Issues
- Lower Energy Cost
- Reduce Dust Mites
- Improve Respiratory Issues
- Prevents damage to wood
- Prevent Dry Skin
- Helps prevent spread of airborne viruses
- Helps your home feel warmer
- Prevents static
- Prevents damage to wood

Whole House Air Filtration/Air scrubbers/UV lights capture and filter out unwanted airborne particulates in your home to create healthier air in your home.

## 3. EQUIPMENT & DESIGN

- **Equipment** - **GREENERGY** Can get just about any equipment you would like; however, we do favor Trane/American Standard for its TOP customer reliability rating for 12 out of the last 13 years.
- **Engineering** - we have a full time Engineer on staff. Your equipment is not being sized and designed by a Salesperson. Our engineering department will design a system that works for both you and your home.
- **Controls** - smart t-stats and zone controls are becoming increasingly popular. These days we have multiple temperature setting for different zones in our car. It just makes sense to have our home as comfortable. These devices save energy and increase comfort.

- **Comfort Advisor** - let us schedule a comfort advisor to visit you in your home. Comfort advisors are trained to look at your overall living space, listen to your needs and then work with engineering and our different product lines to develop cost effective solutions for **Complete Comfort Living** in your home.
